

Monitoring of landfill gas quality and quantity is essential for ensuring extraction systems maintain their efficiency and effectiveness.

Quick-connecting Tefen fittings, ball valves and tubing have proven long-term performance for monitoring landfill gas and can be incorporated into pipe systems, manifolds and wellheads.

A complete assembly, comprising a threaded nipple, female quick connect fitting complete with a dust cap and male hosetail to attach to tubing, is also available.

Applications

- Landfill gas extraction systems
- Landfill gas monitoring

Features

- Quick connection
- Easy to use
- Proven use within landfill for over 20 years
- Landfill gas & leachate resistant

Accessories

- 8 x 6mm PVC clear hose – 30m coil
- ¼" ball valve
- 6mm x ¼" BSPM hosetail
- NW6 hose connector for 6mm tubing
- Tefen dustcap

NW6 Specifications

Material	Acetal resin, stainless steel spring. Sealed by NBR "O" ring.
Colour	Black and red
Working pressure	Up to 14 bar at 20°C
Temperature	-20 to + 80 °C
Body Connection	¼" BSPF
Nipple connection	¼" BSPM
